

Calculus I Student Questionnaire

Math 124, section 26, fall 2008
4:00-4:05 p.m. MTWR, Psych 206

Welcome to Calculus I at the University of Arizona! To help me get acquainted with you, please answer the following questions.

What is your name?

What do you prefer to be called (e.g. abbreviation or nickname)?

What is my name?

What is your year in school?

What is your current major? (Feel free to say “undecided”!)

If you are thinking about switching, what major(s) are you considering?

What is the last math class you took? How long ago was that?

What other math classes, if any, do you currently believe you are likely to take as an undergraduate?

Please list your expectations for the course: What do you believe you will need to do in order to be successful in this course? (This question is intentionally vague — I want to sound out your thoughts without leading you in a particular direction.)

Please ask someone near you for their favorite anything; tell me their name and what that thing is. It's up to you to make sure everyone gets covered.
